ebastien Dubois

Stanford, CA, USA sdubois@stanford.edu 617-229-9742 github.com/sds-dubois in linkedin.com/in/sebdubois http://bit.do/sdubois **Education** Stanford University (CA, USA) 2015 - 2017 Master's degree in Computational and Mathematical Engineering, Data Science Track 2012 - 2015 **École Polytechnique** (Palaiseau, France) Diplôme d'ingénieur (MS) in Computer Science and Applied Mathematics GPA: 3.9/4 Lycée Hoche, Classes préparatoires (Versailles, France) 2010 - 2012 Intensive undergraduate program in science preparing for the national competitive exam to the GPA: 4.0/4 French Grandes Écoles for scientific studies. Majors: Mathematics, Physics Relevant projects & work March 15 - July 15 Research internship at CSAIL, MIT (Cambridge, MA, USA) • Developed Bayesian optimization methods in Python to auto-tune machine learning pipelines • Designed a new regression algorithm that improved upon Gaussian Processes • Received the Research Internship Award in Computer Science **Face recognition** (team of 2) Oct. 14 - Jan. 14 • Developed C++ software to identify celebrities in photos using machine learning techniques • Focused on image analysis: extracting specific parts of the face, computing SIFT descriptors **Evolutionary algorithms** (team of 2) May 14 - June 14 • Implemented and tested a new class of evolutionary algorithms in Java • Designed such algorithms to efficiently solve complex optimization problems on graphs Data storage system distributed on a network (team of 3) May 14 - June 14 • Built from scratch in Java a self-adaptive system enabling reliable storage Challenges tackled: parallel architecture, network communications, robustness Smart buildings (team of 6) Sept. 13 - June 14 • Designed a Raspberry Pi platform to manage connected objects with conditional statements • Integrated smart sensors at development stage despite poor documentation and code interface • Designed applications by processing the sensor's data to reduce energy consumption Work experience & leadership July 14 - Aug. 14 Summer internship at ST Microelectronics (Greater Noida, India) • In charge of STM's hardware integration for a start-up new home automation product • Designed and prototyped the ZigBee module in a multi-processor architecture IT consulting for XProjets, Junior Enterprise at the École Polytechnique Sept. 13 - June 14 • Reviewed the information system of a charity, Designed a community portal • In a team of 4, studied car fleet and client management solutions for an innovative taxi service Sept. 12 - April 13 **Leadership training in the French Army** at Régiment d'Infanterie Chars de Marine (Poitiers) • Supervised, managed and trained twenty soldiers

Hobbies and interests

Technology enthusiast	Workflow optimization	Traveling
Enjoy discovering new tools	Willing to investigate best workflows	India, Canada, Brazil, Mexico, Africa
and open source projects	for programming, working, and in life,	Sports
Always eager to learn	for fun and efficiency	Swimming (competitive), Windsurfing

Skills

Programming languages	Computing	Foreign languages
Python, C++, Java, R	Git, LaTeX	French: mother tongue
SQL	Windows, Linux	English: full proficiency
